SONU JANGID

MERN STACK DEVELOPER

Jaipur, Rajasthan, India | 6377184793 | sonujangir992002@gmail.com
github.com/Sonu7788 | linkedin.com/in/sonujangirpilani

PROFESSIONAL SUMMARY

MERN Stack Developer with 6 months of hands-on internship and full-time experience building production-oriented web applications, REST APIs, authentication flows, CRUD systems, dashboards, and database-driven modules. Strong in React, JavaScript, Node.js, Express.js, MongoDB, MySQL, PostgreSQL, Sequelize, and API integration. Experienced across healthcare, sports, commerce, education, travel, hyperlocal delivery, hotel, and community-management products.

TECHNICAL SKILLS

Frontend	React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive UI
Backend	Node.js, Express.js, REST APIs, JWT, Authentication, RBAC, CRUD, Middleware, Validation
Databases	MongoDB, Mongoose, MySQL, Sequelize, PostgreSQL, PostGIS
Integrations	Razorpay, Firebase/FCM, Nodemailer/SMTP, Third-Party REST APIs, File Uploads
Tools	Git, GitHub, Postman, VS Code, PM2, Linux/Server Deployment
AI-Assisted Development	Cursor, Claude, Antigravity, AI-assisted coding and debugging

PROFESSIONAL EXPERIENCE

Objectg Square, Jaipur — MERN Stack Developer

Internship + Full-Time Experience | 6 months

- Developed RESTful APIs using Node.js and Express.js with MongoDB, MySQL, and PostgreSQL.
- Built React interfaces, dashboards, forms, authentication flows, CRUD modules, and API integrations.
- Implemented role-based access, validation, middleware, file uploads, notifications, and payment workflows.
- Worked with Sequelize, Mongoose, Postman, Git/GitHub, PM2, and production environment configuration.
- Debugged backend, database, API, deployment, and integration issues across real-world applications.
- Contributed from database/model design and API implementation through frontend integration.

SELECTED PROJECTS — PART 1

DrMate — Healthcare / Clinic Management Platform

React/Next.js, Node.js, Express, Sequelize, MySQL

- Doctor, patient and staff workflows, appointments, profiles, consultation reports, diagnostic orders, permissions and billing-related modules.
- Implemented clinic-member roles, designations, authentication, permissions and permission-checking middleware.

ApnaVyapar — Seller & Commerce APIs

Node.js, Express, Sequelize, MySQL

- Built seller, product, category, KYC/store and commerce APIs with validation and image uploads.
- Implemented multi-seller order handling and order-item-level status management.

SportsLivv — Sports Management Platform

React, Node.js, REST APIs

- Worked on admin/management interfaces, API integration, data management and sports-related operational workflows.

VetPathshala — Education / Veterinary Platform

React, Node.js, REST APIs, Database

- Worked on application modules, API integration, data flows and backend functionality for an education-focused platform.

SELECTED PROJECTS — PART 2

Hyperlocal Delivery / Rider / Parcel Platform

Node.js, Express, PostgreSQL, PostGIS, Firebase

- Worked on location-based product/food delivery, rider assignment, parcel lifecycle, order status, tracking and notification workflows.
- Used PostgreSQL/PostGIS geospatial concepts, distance calculations and Firebase Cloud Messaging for event-driven notifications.

Society Management Platform

Node.js, Express, PostgreSQL

- Worked on society, admin, buildings, wings, units, flat types, amenities, subscriptions, approvals and resident-management workflows.
- Implemented PostgreSQL-backed modules, validation and API workflows for administrative operations.

Hotel Management & Booking Platform

Node.js, Express, Sequelize, MySQL

- Worked on hotel rooms, availability, bookings, POS, banquet booking, approval, KYC and related API workflows.

Exams & Courses Platform

Node.js, Express, Sequelize/MySQL

- Worked on exams, subject/topic/subtopic hierarchy, course-to-exam relationships, user-role mapping and course subscription workflows.

Ekloy — Travel Platform

React, Node.js, REST APIs

- Developed application features and API-driven workflows for a travel-focused product.

BACKEND & ENGINEERING STRENGTHS

- **API Development:** REST APIs, CRUD, validation, JWT authentication, authorization, middleware, error handling and frontend/mobile integration.
- **Database Engineering:** MySQL, PostgreSQL and MongoDB; relationships, migrations, constraints, queries, indexing and transactions.
- **Location-Based Systems:** PostgreSQL/PostGIS, coordinates, distance calculation, hyperlocal delivery, rider assignment and parcel tracking.
- **Notifications & Integrations:** Firebase/FCM, Razorpay, SMTP/Nodemailer, file uploads and third-party APIs.
- **Development & Deployment:** Git/GitHub, Postman, PM2, Linux/server environments, debugging and production issue resolution.

EDUCATION

Master of Computer Applications (MCA)

University of Engineering and Management (UEM), Jaipur

2024 – 2026 | CGPA: 8.0/10 | Completed: 2026

ADDITIONAL TECHNICAL KNOWLEDGE

- **Java:** OOP, Collections, Exception Handling, Memory Management, Garbage Collection.
- **JavaScript:** ES6+, Promises, Async/Await, Event Loop, Call Stack, Asynchronous Programming.
- **Computer Science:** Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems.
- **Mobile / Cloud:** Basic Kotlin/Android development and cloud-computing fundamentals.

PROFESSIONAL STRENGTHS

Problem Solving • Backend Development • Database Design • API Integration • Debugging • Authentication • Payment Integration • Deployment • Responsive UI • AI-Assisted Development

CAREER OBJECTIVE

To grow as a strong MERN/Node.js engineer by building scalable APIs, reliable database-driven systems, and production-ready applications while deepening expertise in cloud computing, distributed systems, performance optimization, and backend architecture.
